

## Flexible & Responsive Options

Tray cable is often considered 'the workhorse cable' for many industrial projects. Built for installation in cable trays or raceways, it can be used for power, lighting control, or signaling. Tray cable is tough and resistant to the elements and can be deployed in wet or dry locations and indoors or outdoors, making it ideal for a range of industrial applications.

### The Problem with Other Tray Cable Options

Most cable manufacturers require a large minimum order of tray cable — in some cases, 50,000 feet and above. However, many industrial electrical contractors only need smaller runs of tray cable, and with unique color codes. This forces them to purchase extra cable they can't use for the job at hand — an unwanted expense when margins are thin.

### The Kris-Tech Tray Cable Solution

We offer a full line of tray cables with the following features:

- ✓ Both VNTC (THHN inner, PVC outer jacket) and XPTC (XLP insulation, PVC outer jacket) options — with shielded versions for both configurations.
- ✓ All tray cable material is compliant with UL 1277 with direct burial rating as per UL.
- ✓ Comply with NEC 9.2 and 9.3 standards and carry an ER (Exposed Run) rating.
- ✓ Available in small runs and a range of color codes based on customer requirements.
- ✓ Available for expedited shipping.

**VNTC Tray Cable #12-2**  
AWG Shielded With and Without  
Ground THHN/PVC

**VNTC Tray Cable #12-2**  
AWG With and Without  
Ground THHN/PVC

**VNTC Tray Cable #18-10**  
AWG Shielded THHN/PVC

**VNTC Tray Cable #18-10**  
AWG Unshielded THHN/PVC

**XPTC Tray Cable #12-2**  
AWG Shielded With and Without  
Ground XHHW/PVC

**XPTC Tray Cable #12-2**  
AWG With and Without Ground  
XHHW/PVC

**XPTC Tray Cable #14-10**  
AWG Shielded XHHW/PVC
